

Rick,

Thank you for proving that my decision was the right one.

As you are aware, I have been a Structural Engineer in the Palm Beach and Broward County area for almost thirteen years. I am the engineer of record for both custom and production homes totaling as many as 1250 homes per year. Many of the higher-end custom homes are for ocean/intercoastal properties and in very sought after country club communities. Much of my work requires field inspections, which keeps me in touch with many builders and sub-contractors. With this first-hand knowledge of who's who in the custom home building industry, and understanding what it means to have the *best* builder – one whom you can trust, does what he says and can deliver. I knew that I had to make only one decision when it came time for me to build my dream home on a deep water lot in East Boca Raton. The decision that I made was to ask if you would build a house for me and my family. Also Rick, I have to tell you, I never asked anyone else or even considered it. I knew that your operation was the best, and you proved it. Therefore, sitting here in my beautiful home office, I want to thank you for proving that my decision was the right one and thank you for a job superbly done.

As well as thanking you personally, I have to thank everyone who worked so hard to put such an immense project together. From the loans, to the demolitions, through the construction, to the CO, your team was excellent. Quite honestly, I never had to “push” my builder; to the contrary, it was you and your office pushing me to keep up with decisions and selections so I did not hold you up. Anita, Linda and Donna kept me informed at every turn and were delightful to work with. Barry, Glenn and Scott ensured perfection from rough construction to the finest details. I want to especially thank Barry for his obvious experience and vast knowledge in helping me through situations and decisions that inevitably present themselves throughout the process of building a home.

I take great pride and joy in showing my home to both my family and friends. They are all in awe when they see the quality of work in the cabinetry, moldings, coffer ceilings, and other decorative interior finishes. Everyone's first question is “Who is the builder?” Without hesitation, I would recommend you to anyone wanting to build his or her dream home.

THANK YOU AGAIN,

Scott B. and family
